## SUMMARY

Full-Stack Developer with 1+ years of experience in Angular, React JS, and Node.js. I design slick, responsive UIs in Figma and wire up REST APIs seamlessly. Python and Git fuel my scalable, game-changing solutions.

---

## EXPERIENCE

### Software Developer | SIM Advisory | Bengaluru, Karnataka | June 2024 – Present

- Developed interactive user interfaces using Angular, delivering end-to-end application features for client projects.
- Integrated REST APIs with backend microservices, optimizing data flow and system performance.
- Designed and implemented responsive UI layouts in Figma, creating user-centric designs for web applications.
- Utilized Python for data processing and analysis, enhancing project-specific data functionalities.
- Managed version control with Git, facilitating efficient collaboration across a team of 5+ developers.

### Software Developer Intern | Kalvium | Coimbatore, Tamil Nadu | December 2023 – February 2024

- Built dynamic web components using React JS, applying core concepts to deliver functional front-end solutions.
- Assisted in back-end development with Node.js, contributing to full-stack feature implementation.
- Strengthened proficiency in Git for version control, supporting team workflows during a 3-month internship.

---

## PROJECT

### DEXCAT-Data Quality & Relevancy Tool | SIM Advisory | January 2025 – Present

- Crafted intuitive dashboards and screens in Figma, leading UI development in Angular with Apache ECharts and NGX Charts for dynamic, user-friendly data visualization.
- Contributed to backend data quality features using Python, optimizing data processing while enhancing UX with responsive chart designs and Git workflows.
- Tech: Angular, Figma, Apache ECharts, NGX Charts, Python, Git.

### Ui Framework for Data Visualization | SIM Advisory | January 2025 – Present

- Built a reusable UI framework in Angular for data visualization, automating component creation across multiple projects.
- Leveraged Angular Workspace to design a scalable, modular system with reusable components.
- Optimized framework and reduced development time by 25% by automating component creation for data visualization projects..
- Tech : Angular, Angular Workspace, Tailwind CSS, Angular Material, Apache ECharts, NGX Charts, Git.

### SPRICED – Pricing Application | SIM Advisory | June 2024 – December 2024

- Developed a robust, production-ready UI using Angular, integrating REST APIs with a Java backend to power real-time pricing updates for enterprise clients.
- Designed responsive layouts in Figma and managed version control with Git, collaborating via Jira to meet tight deadlines.
- Tech: Angular, Figma, REST APIs, Git, Jira, Java.

---

## EDUCATION

### Master of Computer Applications (MCA) | Jabalpur Engineering College | Jabalpur, Madhya Pradesh | 2023 | 8.9/10

---

## SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React JS, Angular ,Charts Library

Backend: Python, REST APIs

Tools: Figma, Git, Jira, GitHub ,Wordpress

Other: UI/UX, Responsive Design, Time Management

---
